

BPIR – Building Product Information Requirements

Class 1

Self Drilling Screws (Metal)

Product Disclosure Information Self-Assessment
Version: 240213

Product Name	Milsons Self Drilling Screws (Metal)
Product Identifier	SD (head type) (gauge x length*) (finish*) e.g. SDHWF12x25G Note: Stainless products display the grade before the gauge.

Declaration

Milsons 2012 Ltd has provided this declaration to satisfy the provisions of Schedule 1(d) of the Building (Building Product Information Requirements) Regulations 2022.

Product Description

Self-drilling Screws are designed for various applications, such as fastening metal to metal and metal to wood. Self-drilling screws can be identified by the drill bit-shaped point of the screw, this alleviates the requirement of a pilot hole. Milsons offer a broad selection of sizes, finishes and head types that are suitable for both interior and exterior use. The dimensions and mechanical properties are based on international standard AS 3566.1

Scope of Use

Self-drilling screws intended for use in residential and commercial metal construction to secure various building components.

Conditions of Use

The responsibility for choosing the correct size/diameter and finish of the product, as well as applying the appropriate torque during installation in accordance with the application's requirements, rests with the user. To facilitate your decision-making process, we recommend consulting our technical guides, available at the following web address: <https://milsons.co.nz/category/technical-resources>.

Contribution to Building Code Clauses

Relevant Code Clauses	Contributions to Compliance
B1 Structure — B1.3.1, B1.3.2, B1.3.3 (b, d, e, f, g, h, j, q), B1.3.4	Compliance with B1 Structure is contingent upon the design crafted by the designated professional, such as a consulting structural engineer or architect. Design data is accessible to these professionals to ensure compliance with the provisions stipulated in NZS 3603 or AS/NZS 1720 & NZS 3404 Parts 1 and 2:1997. Refer to the AS/NZ standard and installation requirements for further information.
B2 Durability — B2.3.1 (a)	The product is offered in multiple coating options or in stainless steel. Compliance with B2 Durability is contingent upon the selection of the most appropriate coating or material, in accordance with the specific application. This decision should be based on the required durability for the intended use, taking into consideration the environmental conditions in which the product will be situated. This should be made by the designer.
F2 Hazardous building materials — F2.3.1	These products are safe when handled and do not contain or emit harmful materials. There are no requirements for this product in order to comply with Acceptable Solution F2/AS1, First Edition Amendment 3, 2017.
