## Chem Set Studs

Product Disclosure Information Self-Assessment

Version: 240727

Product Name	Milsons Chem Set Studs
Product Identifier	CSS (diameter x length*) (finish*) e.g. CSS12X160G Note: Stainless products display the grade before the diameter.

### Declaration

Milsons 2012 Ltd has provided this declaration to satisfy the provisions of Schedule 1(d) of the Building (Building Product Information Requirements) Regulations 2022.

### Product Description

Chem Set Studs are chisel pointed anchor rods that pair a Chem-Stud adhesive\* during installation. (\*Milsons do not supply the partnering adhesive). Chem Set Studs are suitable for anchoring structural steel column/ beams, and can also be placed towards the edge of concrete substrates and through masonry block. The non-expanding nature of a chemically-held rod drastically reduces the chance of the surrounding concrete cracking. Milsons offer Chem Set Studs in Both 316 stainless steel and Hot Dip Galvanised finish.

### Scope of Use

Chem Set Studs intended uses are primarily suited for heavy duty anchoring in solid concrete.

### Conditions of Use

The responsibility for choosing the correct size/diameter and finish of the product, as well as applying the appropriate torque during installation in accordance with the application's requirements, rests with the user. To facilitate your decision-making process, we recommend consulting our technical guides, available at the following web address: <https://milsons.co.nz/category/technical-resources>.

## Contribution to Building Code Clauses

Relevant Code Clauses	Contributions to Compliance
B1 Structure — B1.3.1, B1.3.2, B1.3.3 (b, d, e, f, g, h, j, q), B1.3.4	Compliance with B1 Structure is contingent upon the design crafted by the designated professional, such as a consulting structural engineer or architect. Design data is accessible to these professionals to ensure compliance with the provisions stipulated in NZS 3101.1&2:2006 & NZS 3109:1997 Refer to the AS/NZ standard and installation requirements for further information.
B2 Durability — B2.3.1 (a)	The product is offered in multiple coating options or in stainless steel. Compliance with B2 Durability is contingent upon the selection of the most appropriate coating or material, in accordance with the specific application. This decision should be based on the required durability for the intended use, taking into consideration the environmental conditions in which the product will be situated. This should be made by the designer.
F2 Hazardous building materials — F2.3.1	These products are safe when handled and do not contain or emit harmful materials. There are no requirements for this product in order to comply with Acceptable Solution F2/AS1, First Edition Amendment 3, 2017.
