

# Hex Bolt & Nut Marking Identification

This resource provides clear illustrations of different markings on hex head bolts and nuts. The hex head of the bolt or nut will often contain different markings from the manufacturer which gives information on the different grades and classes of steel that the bolts are made from. The sheet contains markings for both imperial and metric bolts.

## Hex Bolt

### Metric

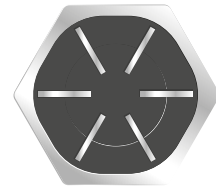

4.6 = Mild Steel  
4.8 = Mild Steel  
8.8 = High Tensile (Class 8)  
10.9 = High Tensile (Class 10)

### Imperial Grade 5

3 Lines = Grade 5

### Imperial Grade 8

6 Lines = Grade 8

---

## Hex Nut

### Metric

Tensile Ratings:  
|5| = Class 5  
|8| = Class 8  
|10| = Class 10

### Imperial Grade 5

### Imperial Grade 8

① Markings may vary between manufacturers. The data provided in this document is for general guidance only and should not be solely relied upon when working to stringent specifications.
