## Purlin Bolts

Product Disclosure Information Self-Assessment

Version: 240727

Product Name	Milsons Purlin Bolts
Product Identifier	PBN88 (diameter x length*) (finish*) e.g. PBN8812X30G

### Declaration

Milsons 2012 Ltd has provided this declaration to satisfy the provisions of Schedule 1(d) of the Building (Building Product Information Requirements) Regulations 2022.

### Product Description

Purlin Bolts are specifically designed to fix purlins in construction projects. Purlin bolts are a hexagon head flanged bolt with a matching flange nut. The flange design of both the bolt and nut maximizes the grip and contact with the fastened components, and maximises clamping load by distributing the force over a greater surface area. The dimensions and mechanical properties are based on international standard AS/NZS 1110.1. Milsons offer a selection of sizes and finishes, that are suitable for both interior and exterior use. (Test Certificates are available for this product on request).

### Scope of Use

Purlin bolt assemblies are commonly used in the fastening of roofing, framing, and wall sheeting across various industrial, commercial, and civil applications.

### Conditions of Use

The responsibility for choosing the correct size/diameter and finish of the product, as well as applying the appropriate torque during installation in accordance with the application's requirements, rests with the user. To facilitate your decision-making process, we recommend consulting our technical guides, available at the following web address: <https://milsons.co.nz/category/technical-resources>.

## Contribution to Building Code Clauses

Relevant Code Clauses	Contributions to Compliance
B1 Structure — B1.3.1, B1.3.2, B1.3.3 (b, d, e, f, g, h, j, q), B1.3.4	Compliance with B1 Structure is contingent upon the design crafted by the designated professional, such as a consulting structural engineer or architect. Design data is accessible to these professionals to ensure compliance with the provisions stipulated in NZS 3404 Parts 1 and 2:1997. Refer to the AS/NZ standard and installation requirements for further information.
B2 Durability — B2.3.1 (a)	The product is offered in multiple coating options or in stainless steel. Compliance with B2 Durability is contingent upon the selection of the most appropriate coating or material, in accordance with the specific application. This decision should be based on the required durability for the intended use, taking into consideration the environmental conditions in which the product will be situated. This should be made by the designer.
F2 Hazardous building materials — F2.3.1	These products are safe when handled and do not contain or emit harmful materials. There are no requirements for this product in order to comply with Acceptable Solution F2/AS1, First Edition Amendment 3, 2017.
