# Polycarb Roofing Screws

Product Disclosure Information Self-Assessment  
Version: 250828

Product Name	Milsons Polycarb Roofing Screw
Product Identifier	(head type) (product) (gauge x length) (finish) (pack size) e.g. HWFPC12X50G-B50

## Declaration

Milsons 2012 Ltd has provided this declaration to satisfy the provisions of Schedule 1(d) of the Building (Building Product Information Requirements) Regulations 2022.

## Product Description

Milsons Polycarb Roof Screws are fasteners for securing polycarbonate roofing sheets – with a self-drilling tip, a threaded shank, a sealing washer, and a hex drive head. Manufactured with a weather-resistant washer, they provide a watertight seal that protects against leaks while allowing for controlled thermal movement in roofing applications. The self-drilling point ensures fast, accurate installation into timber or steel battens.

## Scope of Use

Polycarb roofing screws are intended for use in residential and commercial timber construction to secure polycarbonate roofing sheets into timber or steel battens.

## Conditions of Use

The responsibility for choosing the correct size/diameter and finish of the product, as well as applying the appropriate torque during installation in accordance with the application's requirements, rests with the user. Installation should be carried out by a qualified tradesperson, following accepted industry standards, the manufacturer's guidelines, and the relevant roofing and cladding best practice codes.

## Contribution to Building Code Clauses

Relevant Code Clauses	Contributions to Compliance
B1 Structure — B1.3.1, B1.3.2, B1.3.3 (b, d, e, f, g, h, j, q), B1.3.4	Compliance with B1 Structure is contingent upon the design crafted by the designated professional, such as a consulting structural engineer or architect. Design data is accessible to these professionals to ensure compliance with the provisions stipulated in NZS 3603 or AS/NZS 1720 & NZS 3404 Parts 1 and 2:1997. Refer to the AS/NZ standard and installation requirements for further information.
B2 Durability — B2.3.1 (a)	The product is offered in galvanised coating. Compliance with B2 Durability is contingent upon the selection of the most appropriate coating or material, in accordance with the specific application. This decision should be based on the required durability for the intended use, taking into consideration the environmental conditions in which the product will be situated. This should be made by the designer.
F2 Hazardous building materials — F2.3.1	These products are safe when handled and do not contain or emit harmful materials. There are no requirements for this product in order to comply with Acceptable Solution F2/AS1, First Edition Amendment 3, 2017.
