Declaration

Milsons 2012 Ltd has provided this declaration to satisfy the provisions of Schedule 1(d) of the Building (Building Product Information Requirements) Regulations 2022.

Product Description

Milsons supplies a range of Dome Head and Large Flange rivets featuring aluminium bodies with steel nails/mandrels.

Scope of Use

Suitable for a wide variety of industries and applications. Milsons dome head rivets provide neat, strong joins with excellent load distribution - ideal for automotive, marine, signage, and sheet metal use. Milsons large flange rivets' load spread makes them suitable for plastics, wood, thin sheet metal, and high-vibration jobs.

Conditions of Use

The responsibility for choosing the correct size/diameter and finish of the product, as well as applying the appropriate installation technique in accordance with the application's requirements, rests with the user. Installation should be carried out by a qualified tradesperson, following accepted industry standards, the manufacturer's guidelines, and the relevant roofing and cladding best practice codes.

Installation

- 1 Fit the rivet tool with the correct nozzle size.
- 2 Place the rivet mandrel into the tool jaws.
- 3 Check alignment - the nozzle must sit flush with the rivet head, and the rivet head must sit flush against the base material.
- 4 Operate the tool until the mandrel snaps off.

Contribution to Building Code Clauses

| Relevant Code Clauses | Contributions to Compliance |
|---|--|
| B1 Structure — B1.3.1, B1.3.2, B1.3.3 (b, d, e, f, g, h, j, q), B1.3.4 | Compliance with B1 Structure is contingent upon the design crafted by the designated professional, such as a consulting structural engineer or architect. Design data is accessible to these professionals to ensure compliance with the provisions stipulated in NZS 3603 or AS/NZS 1720 & NZS 3404 Parts 1 and 2:1997. Refer to the AS/NZ standard and installation requirements for further information. |
| B2 Durability — B2.3.1 (a) | The product is offered in aluminium bodies with steel nails/mandrels. Compliance with B2 Durability is contingent upon the selection of the most appropriate coating or material, in accordance with the specific application. This decision should be based on the required durability for the intended use, taking into consideration the environmental conditions in which the product will be situated. This should be made by the designer. |
| F2 Hazardous building materials — F2.3.1 | These products are safe when handled and do not contain or emit harmful materials. There are no requirements for this product in order to comply with Acceptable Solution F2/AS1, First Edition Amendment 3, 2017. |
